## PROFILE

I am a passionate software developer with expertise in the MERN stack (MongoDB, Express.js, React, Node.js), frontend technologies (React, Flutter), and backend development. I enjoy building scalable, user-friendly applications and have a strong understanding of UI/UX principles. I am a quick learner, always eager to explore new technologies and improve my skills. My ability to collaborate effectively with teams allows me to create innovative solutions, and I am committed to writing clean, maintainable code.

## PROJECT

### Adventure pal

#### 📄 [GitHub Repository](#)

- Developed a hotel booking system Using MERN stack.
- Implemented Filter functionality based on destinations

### Pawtopia

#### 📄 [GitHub Repository](#)

- Developed a pet service platform using MERN stack (MongoDB, Express.js, React, Node.js).
- Designed an intuitive UI/UX design.

## Education
